

Cover 3 Cloud

- C3 Sky = Safety rolls down
- C3 Cloud = Corner rolls down

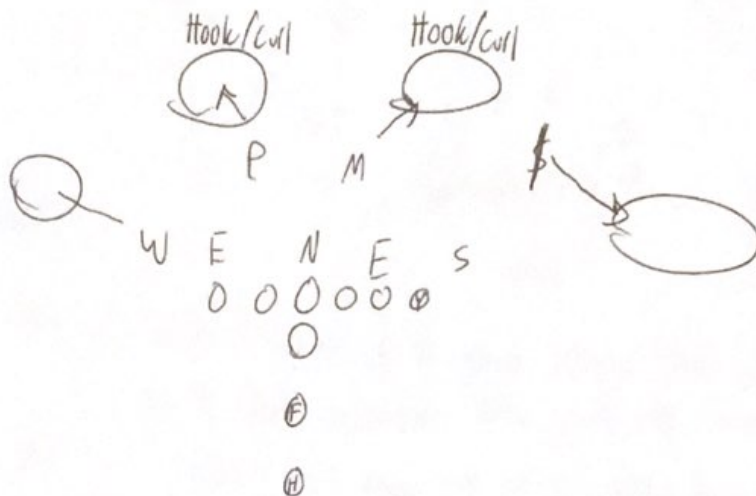

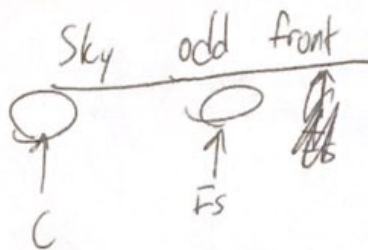

Strengths

- Jam the outside WR without worry
- Handles bubbles/swings

Weak

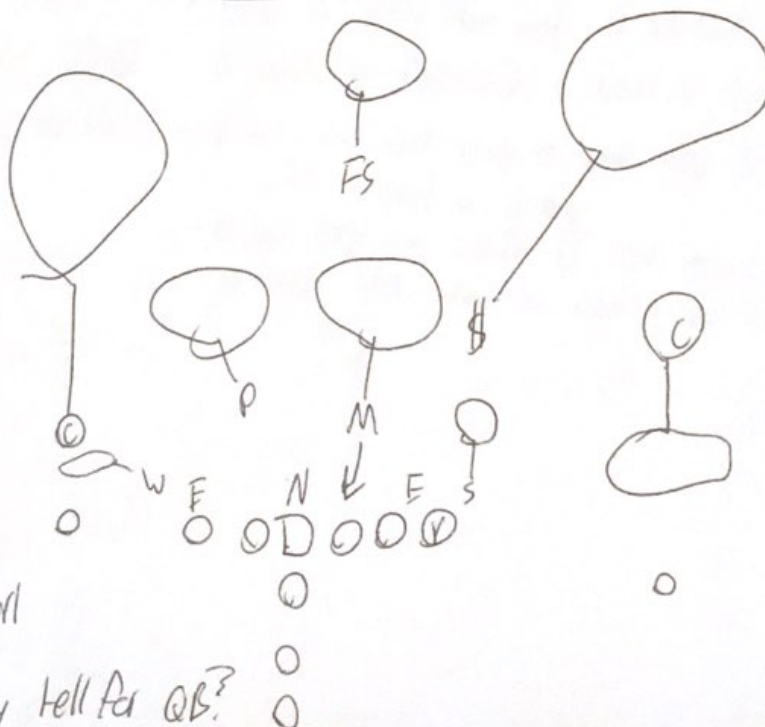

Not as strong in run support

- Four vults? FS moving away from route concept
- Backside seam can be kill shot

Cloud odd front

- Most teams are running 3 match or C2
- This is good switch up

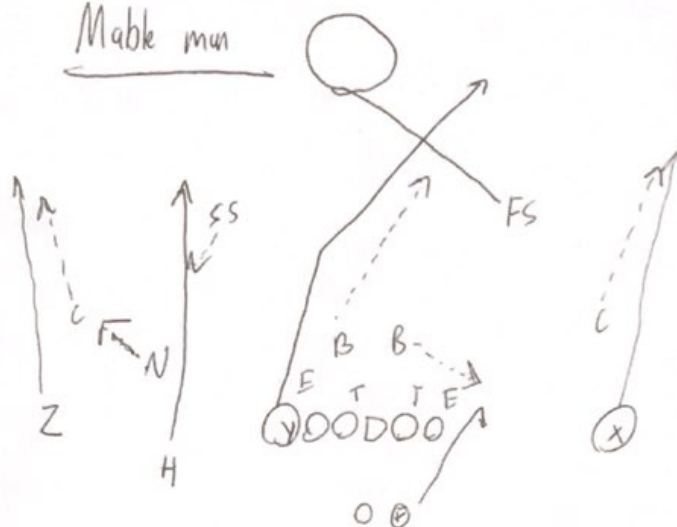

- Can drop Sam to hook/curl
- send the Mike

That might be an easy tell for QB?

Cover 3 Match

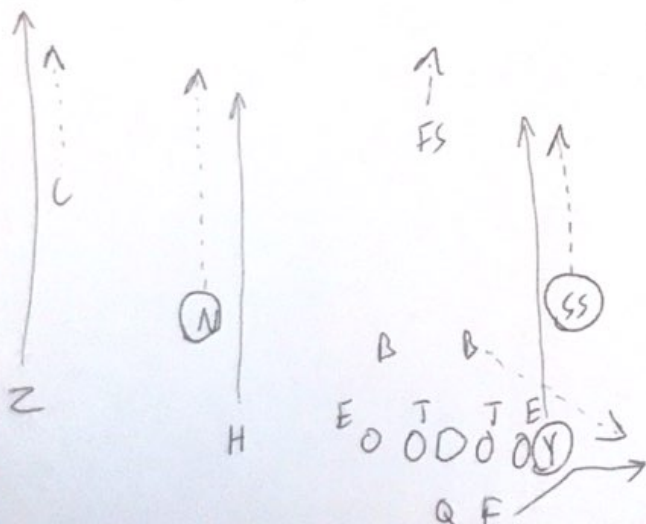

- Legend has it Saban invented it
- Wanted
 1. Spin to single safety
 2. run support
 3. NOT to get torched vertically
- When run properly on verts, it looks like ~~C1~~ C1
- If can't tell C1 or C3, it's probably C3 match!

Mable man

- SS buzzes, if H goes vertical they carry
- N flat defender Hook, curl, out, comeback
- Under call from SS or N, Mike back fills to H

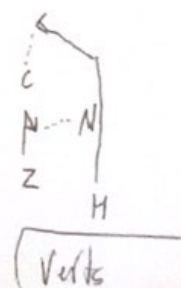

- Player gets vertical, man up
- N and SS, instead of buzzing, if their playu goes vertical they match upfield
- Match on outside hip, so safety ~~let~~ has shorter path to ball.

- Say H runs a shallow cross, N buzzes
- say Z goes flat and H vertical (smash) N goes to flat (Z), C goes to H (vertical)
- 2x2 very good way to inside outside bracket a slot without a double.
- N can help on outside IF slot goes inside
- N helps slot when he carries vertically

Smash

Cover 3 Match in 3 x 1

- Pre snap C2 look
- Screen
- FS sees V goes outside, he is now a robber
